EDUCATION

- **Malaviya National Institute of Technology, Jaipur** 2024 – Present
B.Tech in Electrical Engineering CGPA: 9.37
- **Kendriya Vidyalaya ONGC, Dehradun** 2024
Class XII, CBSE 96.2%
- **Doon Valley Public School, Dehradun** 2022
Class X, CBSE 98.2%

PERSONAL PROJECTS

- **E-Commerce REST API** 2026
Java 21 | Spring Boot 3 | Spring Security | Spring Data JPA | JWT | H2 | Lombok GitHub
 - Built a **multi-entity REST API** covering category management and product catalog with clean **three-layer architecture** (Controller – Service – Repository) and loose coupling via interfaces.
 - Modelled **JPA entity relationships** (One-to-Many Category–Product) with cascade operations, lazy loading, and **H2 in-memory database**; implemented derived queries for keyword search and category filtering.
 - Implemented **JWT-based stateless authentication** and **role-based authorization** (ADMIN / USER) using Spring Security 6; custom filter chain with `AuthTokenFilter`, `AuthEntryPointJwt`, and `BCryptPasswordEncoder` for secure credential storage.
 - Applied **Bean Validation** across request DTOs with a **global exception handler** (`@RestControllerAdvice`) returning structured error responses for validation failures, 404s and business exceptions.
 - Introduced **DTO pattern with ModelMapper** to decouple persistence entities from API contracts; implemented server-side **pagination and sorting** (`Pageable`, `PageRequest`) with configurable defaults.
 - Built **multipart file upload** for product images with UUID-based unique filename generation and server-side file storage; **Lombok** annotations used throughout to eliminate boilerplate.
- **Bank Customer CRUD API** 2026
Java 21 | Spring Boot | Spring Data JPA | H2 GitHub
 - Designed a **RESTful banking customer management API** with full CRUD operations, constructor-based dependency injection, and **Optional-based** null-safe repository queries.
 - Enforced **unique email constraint** at database level via `@Column(unique=true)`; used `ResponseEntity` with correct HTTP status codes (201, 204, 404) across all endpoints.

TECHNICAL SKILLS

Languages: Java (primary), Python, SQL

Frameworks & Libraries: Spring Boot 3, Spring Security 6, Spring Data JPA, Hibernate, Lombok, ModelMapper

Backend Concepts: REST API Design, JWT Authentication, Role-Based Access Control, Three-Layer Architecture, DTO Pattern, Global Exception Handling, Pagination & Sorting, File Upload

Databases: H2 (in-memory), MySQL (familiar)

Tools: IntelliJ IDEA, Git, GitHub, Postman, Maven

DSA: 600+ problems solved on LeetCode (Java) – Arrays, Trees, Graphs, Dynamic Programming

Areas of Interest: Backend Engineering, Fintech Systems, Competitive Programming

POSITIONS OF RESPONSIBILITY

- **Technical Executive**, Quiz Club, MNIT Jaipur Present
- **Mentor**, C2C Club, MNIT Jaipur Present

ACHIEVEMENTS

- **LeetCode:** Solved 600+ Data Structures and Algorithms problems
- **Smart India Hackathon:** Qualified Internal Campus Round
